GENETICS OF THE FUTURE

CLASS 201 ADVANCED TRAINING

# CLASS 201 ADVANCED TRAINING

- Explore the science that supports your greatness,
- Deepen the training of the disciplines, and
- Build upon the wisdom you gained this year about who you really are.

An opportunity for beginning and advanced students to further their knowledge from the archived teachings of Ramtha, conducted by Ramtha's appointed teachers.

## DATES (so far)

Yelm - Sep 10-14

Mexico - Sep 17-21

S. Korea - Oct 8-12

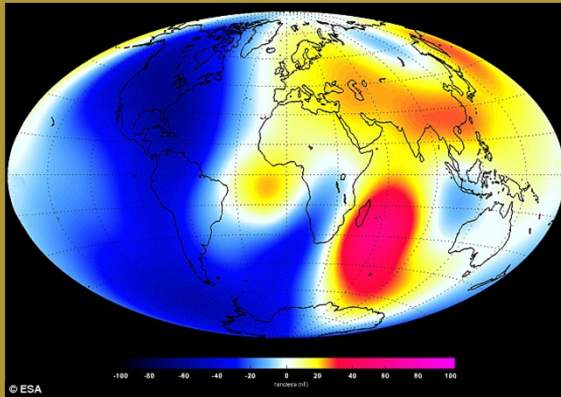

Italy - Oct 15-19

Australia - TBA

S. Africa - TBA

Brazil - TBA

Canada - TBA

## Earth's magnetic field is weakening 10 times faster than thought in the Western Hemisphere

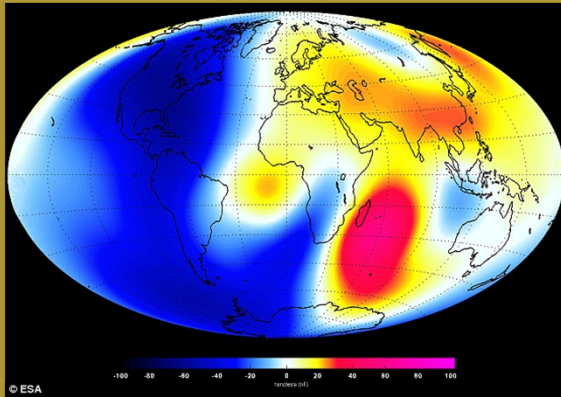

Data was collected by the European Space Agency's Swarm satellites reveals dramatic declines over the Western hemisphere, but a strengthening of the Earth's magnetic field over the southern Indian Ocean. The changes could be due to the magnetic poles getting ready to 'flip.' The latest measurements confirm magnetic North is moving rapidly towards Siberia. Scientists previously estimated the Earth's magnetic field is weakening at five per cent every century and now think it could be 10 times as fast. -- UK's *Daily Mail*.

**The North pole is moving rapidly towards Siberia.**

Yelm Follow-up, November 28, 2012**

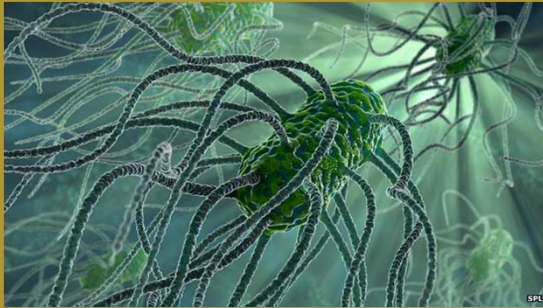

## Ramtha has spoken often about Earth's magnetic field changes

The Earth is going to change. It is going to change in many ways. The nature of the Earth and its magnetic field is shifting because the Earth is in agony. It is a living being. It has been destroyed by a cancer, and the cancer is civilization, ignorance, religion. Religion, I told you, is the emptying of the human being, their God, their divinity, and giving to them the Earth under the guise of economics to destroy it. It was all planned.

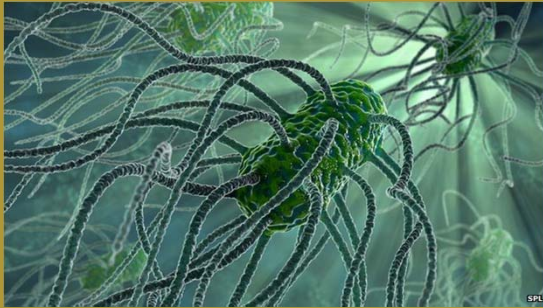

- Ramtha, September 16, 1993  
CD: Winds of Change III

## Antibiotic apocalypse

The World Health Organization has warned that many common infections will no longer have a cure and could once again kill unabated. The US Centers for Disease Control pointed to the emergence of “nightmare bacteria.” And the chief medical officer for the UK has evoked parallels with the apocalypse. Antibiotics kill bacteria, but the bugs are incredibly wily foes. Once you start treating them with a new drug, they find ways of surviving. As long as new drugs keep coming, resistance is not a problem. But there has not been a new class of antibiotics discovered since the 1980s. “This is now a war, and one we are in severe danger of losing,” James Gallagher at the BBC.

## Ramtha's predictions on viruses and bacteria span decades

There are viruses that are intelligent that can change so fast. You don't change but they do. They are the host that is going to feed upon what is not going to change and they are going to destroy you. How do you then prepare for a marching army that is silent, quiet, deceptive, and invisible? You have to be beings whose consciousness is so clean that there is no environment for such an army to march upon. That is the only way you are going to survive what is about to happen to the West.

## UV Blue technology making inroads

Scientists claim blue light could be more effective at keeping you alert than caffeine. Blue light is harmless to tissue but can trigger biological effects in the body. In a study, people exposed to blue light performed better at distraction tests. The same test proved too much for caffeine users who performed poorly. Researchers at Mid Sweden University compared the effects of caffeine and blue light on the brain and found them both to have a positive effect. However, people exposed to blue light performed better on tests of brain function that included a distraction.

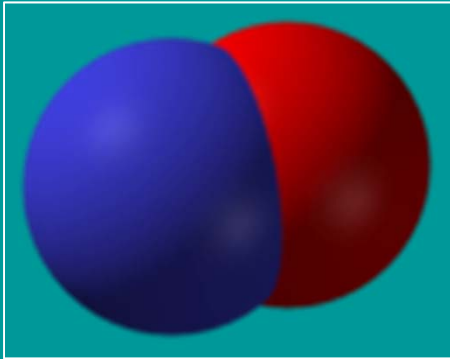

-- *UK's Daily Mail*

## Ramtha on UV blue technology

Amazing work with ultraviolet blue technology is on the horizon in your culture and around the world. It is becoming the answer to killing viruses, germs, and healing diseases. As technology grows from a Blue Body® into the scientific world of health and medicine, just remember where you learned it.

Nitric Oxide

## Inhaled nitric oxide use in newborns

It has emerged as a treatment for hypoxemic respiratory failure in newly born infants. Current evidence shows that inhaled NO improves oxygenation and decreases both deaths or the need for external oxygenation in infants over 35 weeks' gestational age at birth,"

-- *Paediatrics Child Health*, February 2012

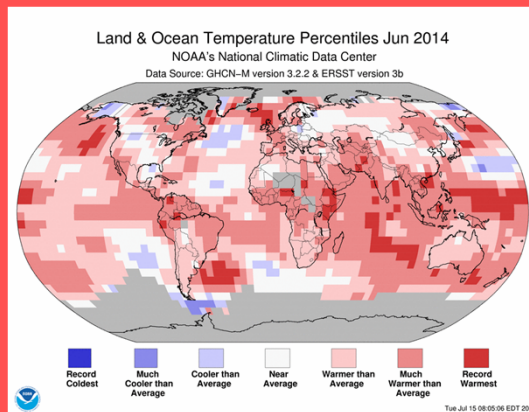

Nitric Oxide

## Ramtha has taught much about Nitric Oxide

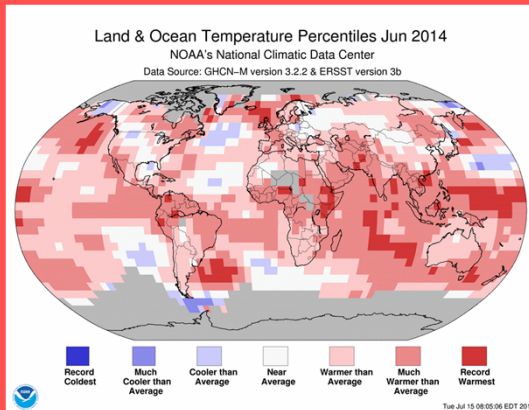

What is nitric oxide? It is a gaseous, atmospheric substance with molecules. Nitric oxide has a phenomenal effect upon the membrane of nerve cells. The molecules of the gas penetrate the membrane of the nerve cell immediately. It has a permeant texture to it that sort of cuts and slices the old metabolic constitution that would cause the genes in the cell to divide.

## UN climate panel issues dire warning of threat to global food supply, and calls for action

On July 17, leading climate scientists issued their annual physical of Earth, comparing the planet in 2013 to a patient that's only getting worse and highlighting problems with key vital signs: from record warmth in Australia and China to sea levels that continue to rise and Arctic sea ice in continued decline. The vital signs reflect "the largest changes that we've been able to witness in the historical record," said Tom Karl, director of the National Climatic Data Center, part of the National Oceanic and Atmospheric Administration. -- Miguel Llanos, *NBC News*.

## Ramtha's predictions on Arctic ice melt span decades

Now your world is in trouble. Your icecaps are melting. The North Pole's icecaps are melting and when all that cold water enters Greenland in the upper Atlantic, the flow of warm water will cease in Atlatia and in a short time you are going to have catastrophic conditions in the world."

-- Ramtha

**TIME**

## June Was Hottest on Record, NOAA Says

**May was the hottest on record, too.**

Not only did 2014 boast the hottest May on record, but new data from the National Oceanic and Atmospheric Administration (NOAA) says that the global population experienced its hottest June ever, too.

According to the NOAA, the combined average temperatures of land and ocean surfaces was 1.30°F above the 20th century average of 59.9°F. If only looking at land surface temperature, though, it was only the seventh highest June on record.

## White House report Climate change is happening now

RSE students are not survivalists. We are sovereignists. We have always been taught to be prepared for anything, to be able to provide and care for ourselves and our families. A sovereign person is able to support their life without gambling on banks, the stock market, or paper investments. I am very proud of this culture of RSE and that our students have heard this message from Ramtha for over 25 years.

-- JZ Knight

## Ramtha's Recommendations for Sovereignty

Move out of the cities and away from the water. Acquire as much as you can of the following items in order to be self-sufficient and not dependent upon social or governmental services:

1. **Food, food, food** — at least two years per person
2. **Water** from a well, tested annually for quality, and stored in quantity
3. Small parcel of **land** in a rural area away from the cities with a well
4. Nonelectrical tools of all kinds
5. Nonhybrid seeds of all varieties
6. Winter clothes, boots, sturdy shoes

**It's about the Future**

**VOTE DEMOCRATIC!!**

**This protects your Future.**

**If you vote Republican, it's about  
the past - your past.**

**Don't be a victim of legislative laws.**

**Voting is an act of creation.**

**Don't be a victim.**
