AP CASE REPORT

Surgical Pathology Report

Case: OS15-02049

Authorizing Provider: Michelle Benoit, MD
04/17/2015 1142

Collected:

Ordering Location: OHMC INPATIENT SURGERY
04/17/2015 1355

Received:

Pathologist: David D Nordin, MD

- Specimens: A) - Uterus w/cervix, bilateral fallopian tubes, and ovaries
B) - Pelvic lymph node, right pelvic lymph nodes
C) - Appendix
D) - Pelvic lymph node, left pelvic lymph nodes

AP FINAL DIAGNOSIS

A. Uterine cervix:

- Focally dilated endocervical glands; endocervical tunnel clusters.

Uterine corpus:

- Single microscopic focus of complex hyperplasia.
- Multiple benign endometrial polyps.
- Most of the endometrium exhibiting cystic atrophy.
- Multiple subserosal and intramural leiomyomata.

Bilateral ovaries and fallopian tubes:

- Involutional changes consistent with patient age.

B. Right pelvic lymph nodes:

- Five lymph nodes negative for metastatic carcinoma.

C. Appendix:

- Fibrofatty obliteration of lumen.

D. Left pelvic lymph nodes:

- Five lymph nodes negative for metastatic carcinoma.

DN/sw

AP CLINICAL INFORMATION

Malignant neoplasm of corpus uteri, except isthmus [182.0]

*original diagnosis***AP GROSS DESCRIPTION**

Received are four formalin-filled containers labeled 'Clermont, Vivian F., H002035865' and a requisition with 'Clermont, Vivian F., H002035865'.
